

ACS712

Fully Integrated, Hall-Effect-Based Linear Current Sensor IC with 2.1 kV_{RMS} Isolation and a Low-Resistance Current Conductor

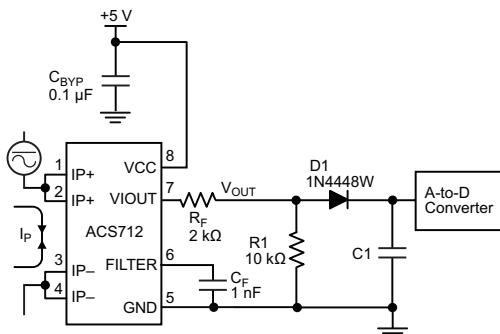

TYPICAL APPLICATIONS

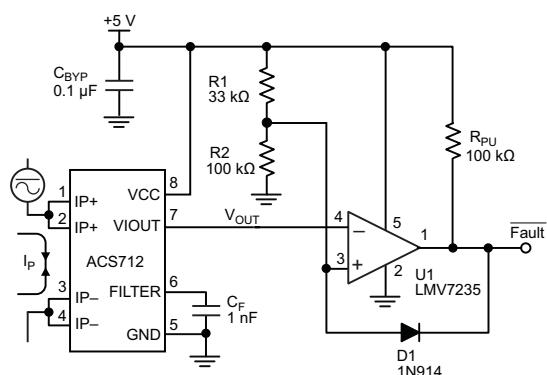

Application 2. Peak Detecting Circuit

Application 3. This configuration increases gain to 610 mV/A (tested using the ACS712ELC-05A).

Application 4. Rectified Output. 3.3 V scaling and rectification application for A-to-D converters. Replaces current transformer solutions with simpler ACS circuit. C1 is a function of the load resistance and filtering desired. R1 can be omitted if the full range is desired.

Application 5. 10 A Overcurrent Fault Latch. Fault threshold set by R1 and R2. This circuit latches an overcurrent fault and holds it until the 5 V rail is powered down.
