This unit consist **two** independent DIGITALLY CONTROLLED (soldering / rework) tools in one enclosure:

- Samsung micro-controller for excellent temperature stability, quiet, heats up rapidly air over stainless steel
- **Brushless Fan** for air volume up to **120L/min**
- Separate ON/OFF switch.
- Separate temperature adjustment and LCD display (scope from 100° C... to500° C MAX $\pm 2^{\circ}$ C stat $^{\circ}$ F Max]
- Separate, sensitive airflow control

Note:

***Brushless Fan** pumps used in our stations provide 5 times more air flow then Diaphragm Pumps*

>>> Brushless 120L/min vs. Diaphragm only 24L/min! <<<

Both pumps are equally smooth and quiet.

We had many units with Diaphragm Pumps broken in transportation (membrane is locked by screws) and much less reliable.
